## PROFESSIONAL SUMMARY

Full-Stack Software Developer with 3+ years of experience building and supporting production SaaS applications using PHP, Python, and React.js. Delivered AI-powered CRM features using the OpenAI API, reducing manual effort by approximately 30%, and automated 150+ end-to-end test scenarios using Playwright and Selenium. Experienced in REST API integration, production debugging, root-cause analysis, and end-to-end feature delivery.

## CORE TECHNICAL SKILLS

- ✓ **Programming Languages:** PHP, Python, JavaScript
- ✓ **Frontend:** React.js, HTML5, CSS3
- ✓ **Backend & APIs:** REST APIs, Flask, API Integration, Backend Development
- ✓ **Database:** MySQL
- ✓ **Tools & Version Control:** Git, SVN
- ✓ **AI Integration:** OpenAI API, AI-Powered Application Features
- ✓ **Core Expertise:** Full-Stack Development, Production Debugging, Root Cause Analysis, SaaS Application Development

## PROFESSIONAL EXPERIENCE

**Software Developer | Infiniti Software Solutions, Chennai | July 2023 - Present**

- Integrated the OpenAI API with Python to build AI-powered lead scoring and follow-up recommendation features, reducing manual CRM effort by approximately 30%.
- Built and maintained an automated end-to-end testing suite using Playwright and Selenium (Python), covering 150+ test scenarios and reducing manual QA effort from approximately 1 day to 4 hours per release cycle.
- Developed and delivered full-stack features for a production multi-client SaaS CRM platform using PHP, Python, and React.js, managing the development lifecycle from requirement analysis and implementation through testing and production deployment.
- Diagnosed and resolved complex production issues through code analysis, log investigation, and root-cause analysis, including PHP version compatibility issues across PHP 7.3 and PHP 8.3 environments.
- Worked directly with customers on Change Requests (CRs), gathering requirements, analyzing existing application flows, implementing custom solutions, conducting demos, and supporting delivery through production.
